

SAMPLE SITE REQUEST FORM – COMMUNITY WATER SYSTEMS

(This form is to be used for Lead and Copper Monitoring)

Tier 1 sampling sites are the highest priority site for monitoring. You may use any mix of sample site types as long as you have put a priority of first finding Tier 1, then Tier 2 and Tier 3 sites. Use the F-2 category only if you have no other place to sample.

RETURN THIS FORM BEFORE TESTING BEGINS. EXPECT NO REPLY.

Of the 5, 10, or 20 samples required by your system, fill in the number of each type of site you will be using.

TIER 1

Single family structures with lead pipes or a lead service line.

Single family structures with copper pipes joined with lead solder installed in 1983 or after.

TIER 2

Multiple family residents with lead pipes, or lead service lines, or lead solder installed in 1983 or after.

TIER 3

Single family structures with copper pipes joined with lead solder in 1982 or before.....

EXCEPTIONAL CASES
